Residents survey on training in dermatological toxicities of anticancer treatments

Ariadna Ortiz Brugués

Dermatologist, MD PhD

Institut Universitaire du Cancer – Oncopole, Toulouse

- Objective: collect information about residents training in dermatological toxicities of anticancer treatments during residency
- In Europe (Task Force Countries) and USA (Oncodermatology Society)
- 30 questions validated by core team (V Sibaud, A Freites, Z Apalla, M Lacouture, A Bang)
- 1 Task Force responsible per country → contact national residents' responsible → mail CRO
- IRB approval (IUCT)

Methodology

- **1. Task Force responsible per country contacts national residents sharing the e-mail address: support-rescue@axiodis.com**

Subject : RESCUE study – your input is needed !

- Dear resident,
- The European Academy of Dermatology and Venereology (EADV) Task Force Dermatology for Cancer Patients, in partnership with the US Oncodermatology Society is conducting this international questionnaire-based survey RESCUE which aims to evaluate the current state of oncodermatology supportive care during residency, including practices, needs, training options, and recommendations to improve and propose a specialized training in dermatologic care of cancer patients and survivors. More than 25 countries will be involved in the RESCUE survey.
- We highly value your input as an international resident in Dermatology in this project and we would appreciate your time answering this questionnaire anonymously. Our aim is to publish the main results, thereby aiding in the further recognition, knowledge and development of this dermatologic subspecialty.
- This survey is estimated to take 5 to 10 minutes to complete.
- If you agree to participate, please send an email to support-rescue@axiodis.com to confirm your participation in order to receive the link of the study.
- Thank you very much for your valuable contribution.

- Sincerely,
- Vincent Sibaud, MD
- Ariadna Ortiz Brugués, MD PhD
- EADV Task Force of Dermatology for Cancer Patients
- Mario Lacouture MD
- Alexander Bang MD
- US Oncodermatology Society

Methodology

- 1. Task Force responsible per country contacts national residents sharing the e-mail address: support-rescue@axiodis.com
- 2. **The student has to write to Axiodis team (support-rescue@axiodis.com) using the e-mail that he/she will use for the reception of the study link**

Methodology

- 1. Task Force responsible per country contacts national residents sharing the e-mail address: support-rescue@axiodis.com
- 2. The student has to write to Axiodis team (support-rescue@axiodis.com) using the e-mail that he/she will use for the reception of the study link
- **3. The student receives an email from Axiodis including the study link and his personal login and password**

Subject : RESCUE study – your link and credentials

Dear resident,

-
- Thank you very much for having accepted to participate in the RESCUE study !
- The objective is to evaluate the current state of oncodermatology supportive care during residency, including practices, needs, training options, and recommendations to improve and propose a specialized training in dermatologic care of cancer patients and survivors.
- We highly value your input as an international resident in Dermatology in this project and we would appreciate your time answering this questionnaire anonymously.
- This survey is estimated to take 5 to 10 minutes to complete.
- Below you will find the study link and your personal login and password to connect:
- *Include*
- Please do not forget to click on the SAVE button once you have finished to answer.
- If you have any issues, please send an email to **support-rescue@axiodis.com**.
- Thank you very much for your valuable contribution.
-
- Sincerely,
- Vincent Sibaud, MD
- Ariadna Ortiz Brugués, MD PhD
- EADV Task Force of Dermatology for Cancer Patients
- Mario Lacouture MD
- Alexander Bang MD
- US Oncodermatology Society
